Improving perfection. Now with Jet-A1

The P2010 TDI is where performance and comfort meet in one complete IFR package. 4 seats; 3 passenger doors; 1 baggage door.

Continental CD-170. Metal wings, landing gear and stabilator. Carbon fibre fuselage. Balanced controls. Unsurpassed stability.

With the P2010TDI your holidays will have a different taste.

The state-of-the-art Tecnam P TwentyTen is the most advanced high-win single-engine aircraft in the marketplace, today with Continental CD-170 Jet-A1

engine. This four-seater aircraft combines together an advanced technology fuselage entirely in carbon fibre with a metal wing and stabilator, an expansive cabin featuring ergonomic front and rear seats with exceptional legroom and a separate third entry door

The wide composite cabin allows for a large instrument panel with state-of-art avionics options: twin touch screen G1000 NXi IFR flat-panel Suite with integrated GFC700 autopilot.

An aircraft that burns just 6.3 US Gal per hour (less than 24 liters) is no longer just a dream. It is no longer a dream to cover almost 1,000nm or stay airborne for more than 14 hours with the full-tank capacity of 63 US Gal (240 liters).

The TDI engine grants excellent high-altitude performance with a fast cruise above 140 KTAS at 10,000ft and a service ceiling of 18,000 ft.

The P2010 TDI is the best way to reach your favorite destinations and live unforgettable moments.

“Manufacturing an aircraft is not just a job, it is a challenge for perfection, driven by infinite passion and dedication.”

Paolo Pascale Langer, CEO

Tangible Proof

Tecnam's choice of Jet-A1 fuel offers the following benefits:

- Reliability and safety thanks to the redundant FADEC system (Full Authority Digital Engine Control) without mechanical back-up;
- Significantly lower operating costs due to lower consumption and lower fuel prices for kerosene in many countries;
- Comfortable operation;
- Jet fuel, same as for civil and military jet aircraft;
- Compliance with U.S. DoD requirements: one single fuel;
- Consumption up to 50% (long-range cruise) less fuel than comparable ignition engines;
- Payload and range improvement;
- Instant start;
- Alternative choice where Avgas is unavailable.

The P2010 TDI is ready to bring to your destination with Sustainable Aviation Fuels (SAF) which can save up to 80% net CO₂ emissions.
